

Business Artificial Intelligence (Certificate)

The Graduate Certificate in Business AI aims to equip students with the knowledge and skills needed to apply artificial intelligence in business decision-making and strategy. Students will develop expertise in AI-driven data analysis, machine learning applications, and the management of AI projects within organizational contexts. By completing this certificate, graduates will be prepared to leverage AI tools to enhance business operations, improve customer insights, and drive innovation. The proposed certificate is designed for professionals seeking to stay competitive in a rapidly evolving digital economy.
