

Department of Animal Science

Animal Science is a broad field centered on the biology, production, management and care of domestic animals, and NC State's Department of Animal Science offers top-tier teaching, research and extension programs that help our faculty and students address critical issues facing the animal industry in North Carolina and beyond.

Undergraduate students study subjects related to various phases of animal science. Courses are offered in anatomy, physiology, nutrition, genetics, reproduction, and management, and there are opportunities for the application of basic scientific training in animal care and well-being areas.

Department Highlights:

- Students interested in Animal Science can join any of several student organizations including the Animal Science Club (https://getinvolved.ncsu.edu/organization/animal_science_club/) or the Pre-Veterinary Club (<http://clubs.ncsu.edu/prevet/>)
- Animal Science students have the opportunity to student abroad, learning all about the equine industry in Ireland, or about veterinary physiotherapy at Harper Adams University in the United Kingdom
- Students in our programs gain valuable hands-on experience in our hands-on teaching labs as well as at the five nearby teaching farms (horse, small ruminant, swine, beef, dairy).
- All in-class laboratory activities involving live animals or animal specimens are approved by the Institutional Animal Care and Use Committee (IACUC)

For more information about our department, including contact information, visit our website (<https://cals.ncsu.edu/animal-science/>).
