Computer Engineering (BS): Computer Architecture and Emerging Systems Concentration

The CPE core courses provide a foundation for all CPE students in electric circuits, digital logic, computer systems, programming, signals, linear systems, embedded systems, discrete math, data structures, teaming and communication, and the social and ethical dimensions of the practice of electrical and computer engineering.

CPE offers a robust set of concentrations to guide students in their studies. All concentrations within CPE share the core courses required by the major. Concentrations are offered in the following areas: Artificial Intelligence and Machine Learning, Computer Architecture and Emerging Systems, Computer Systems Software, Embedded Systems, Networking Hardware, and Networking Software.

Each CPE concentration contains 22 hours of work. Students will take 12 hours from a prescribed list of courses that provide the necessary depth and background to pursue a career in the area. An additional 10 hours from a broader list of "open" electives are also required as part of the concentration, and these are meant to reinforce and add breadth to that area. There are many connections between areas and too many to explicitly list, and therefore, the open category gives students the freedom to choose courses that either broaden or deepen their expertise as they determine appropriate in consultation with their advisor. Furthermore, the open elective list intentionally allows students to take courses outside of ECE, such as other engineering, math, or science courses.

In their final year, all Computer Engineering majors participate in a two-semester senior design course sequence. Students work in teams to solve an engineering problem identified by faculty or industrial sponsors. Over the course of two semesters, students gain experience designing, documenting, and communicating about their project to various audiences.

This curriculum leads to a Bachelor of Science in Computer Engineering and is nationally accredited ABET, http://www.abet.org.

Plan Requirements

Code	Title	Hours
Major Field of S	tudy Requirements	
Math		
MA 141	Calculus I ^{1,2}	4
MA 241	Calculus II ^{1,2}	4

5

- ⁴ A minimum GPA of 3.5 is required to enroll in graduate-level courses. Suggested open electives include computer architecture (ECE
- 406/506), software (ECE 465/565, 466/566, 517), embedded systems (ECE 460/560, 461/561), networking and cloud computing (ECE 407, 470, 547, 570, 573, 574), machine learning and AI (ECE 411, 425/525), controls and robotics (ECE 308, 455/555, 456/556), guantum computing (ECE 469, 569). Depending on availability of seats and permission of CSC department, we also recommend: algorithms (CSC 505), computer security (CSC 405, 415/515), compilers (CSC 412/512), networking (ECE 453), and parallel systems(CSC 548).

A computer engineering degree unlocks a vast array of exciting career opportunities at the forefront of technology. Graduates can delve into roles such as hardware engineers-designing and optimizing the next generation of computing devices-or software engineers who crafting innovative applications and systems that drive technological progress. You have career opportunities in fields like cybersecurity or you can delve into artificial intelligence and machine learning, developing algorithms that power intelligent systems.

Additionally, opportunities abound in areas such as embedded systems, where engineers create the brains behind smart devices, and in networking, where they build the backbone of our connected world. Moreover, with the rapid expansion of fields like the Internet of Things, augmented reality, and quantum computing, the possibilities for computer engineering professionals are continually expanding, offering avenues for creative problem-solving and impactful innovation across industries.

Whether in established tech giants like Apple, Samsung, or Analog Devices, cutting-edge startups, research institutions, or entrepreneurial ventures, computer engineering graduates are poised to shape the future of technology and drive meaningful change in society.

You can see some currently-hiring positions in ePack (https:// my.ece.ncsu.edu/careers/jobs/) for examples of career paths.

Career Titles

- Architectural Drafters
- Automotive Engineering Technicians
- Computer and Information Scientists
- Computer and Information Systems Managers
- · Computer Hardware Engineers
- Computer Network Architects
- Computer Programmer
- · Computer Systems Analyst
- Computer Systems Engineer
- Database Administrator
- Database Architects
- · Electrical and Electronic Engineering Technologists and Technicians
- · Engineering Professor
- Information Security Analysts
- Sales Representative (Computers)
- · Software Developers Applications
- Telecommunications Engineering Specialists

Learn More About Careers

NCcareers.org (https://nccareers.org/)

Explore North Carolina's central online resource for students, parents, educators, job seekers and career counselors looking for high quality job and career information.

Occupational Outlook Handbook (https://www.bls.gov/ooh/) Browse the Occupational Outlook Handbook published by the Bureau of Labor Statistics to view state and area employment and wage statistics. You can also identify and compare similar occupations based on your interests.

Career One Stop Videos (https://www.careeronestop.org/) View videos that provide career details and information on wages, employment trends, skills needed, and more for any occupation. Sponsored by the U.S. Department of Labor.

Focus 2 Career Assessment (https://careers.dasa.ncsu.edu/explorecareers/career-assessments/) (NC State student email address required) This career, major and education planning system is available to current NC State students to learn about how your values, interests, competencies, and personality fit into the NC State majors and your future career. An NC State email address is required to create an account. Make an appointment with your career counselor (https:// careers.dasa.ncsu.edu/about/hours-appointments/) to discuss the results.

Focus 2 Apply Assessment (https://www.focus2career.com/Portal/ Register.cfm?SID=1929) (Available to prospective students) A career assessment tool designed to support prospective students in exploring and choosing the right major and career path based on your unique personality, interests, skills and values. Get started with Focus 2 Apply and see how it can guide your journey at NC State.
